

Amazing cleaning at all levels!

- TriVac™ 700, fitted with AquaDrive technology, **cleans both the floor and surface. Its three venturi jets suck up all types of debris**
- **Reversing:** TriVac™ 700 has a reverse function that allows it to turn round, thus avoiding any risk of getting stuck
- **Wide suction inlet,** preventing the cleaner from becoming clogged
- **Extra-wide debris bag with integrated float:** the robotic cleaner can carry more and more debris, without being slowed down or dragged down
- **Choice of cleaning mode : floor or skimming**

YEARS OF WARRANTY

2 TOTALLY PARTNER **+1**

NEW

Unique reversing frequency

The forward action of the pressure jets enable the robotic cleaner to back up and turn continuously. Pressurised water is expelled from a jet at the front of the cleaner to turn the cleaner round and allow it to continue its cleaning cycle.

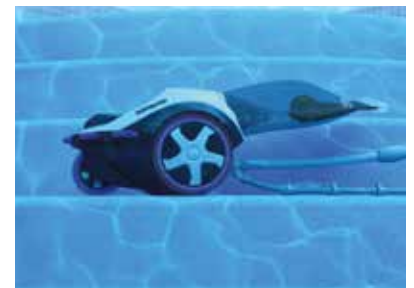

Skimming mode

Floor mode

AquaDrive technology provides optimum coverage, while minimising wear and tear on the pool coating.

Floor mode

You choose and TriVac™ 700 cleans

Just one button to turn to choose the cleaning mode: skimming or floor

TriVac™ 700 operates with our Hayward booster pump SP6050

TRIVAC™ 700

Type of area	Max. pool size	Debris bag capacity	Reversing frequency	Average reversing time	Item*
all coatings	5 * 10 m	5,6 l	60-75 seconds	5-10 seconds	TVP700C

*TriVac™ 700 requires a booster pump
