SINCE 1964

Pumps **variable-speed**

EXTREMELY QUIET. SAVINGS. FILTRATION QU

QUIETER

Great acoustic comfort, thanks to pumps that rotate more slowly while filtering, as high speeds are used only for backwashing.

UP TO 85% SAVINGS ON YOUR ELECTRICITY CONSUMPTION

The total volume of pool water must be renewed at least 3 times a day and is the most expensive energy-consuming item in a pool.

That is why Hayward continues to innovate with its variable-speed pumps.

Principle: water circulates continuously at low speed.

Result: **electricity consumption is reduced by up to 85%***.

MORE EFFICIENT

Thanks to their 24-hour operation:

- slower speed through the filter increases filtration efficiency,
- the other equipment (heating, electrolysis, etc.) always operates at optimum performance,
- quieter and more reliable.

*Energy savings of at least 65% are generally achieved.

GOOD
TO KNOW

In summer, on average, **45% of the electricity bill represents the cost of operating a pool.** Thanks to the electricity saved by using a variable-speed pump, **the cost of the pump is recouped in 3 seasons!**

QUALITY.

SIMPLE

... to install, even in the case of a renovated pump.
And the user interface provides access to information and allows **intuitive control of its 3 speeds on a day-to-day basis:**

- 1 **Low filtration speed:** for normal 24-hour operation
- 2 **High filtration speed:** to clean up green water or to operate a suction cleaner
- 3 **Fast speed:** for maintenance operations (cleaning the sand filter, draining the pool, priming, etc.)

CHOICE

5 models for different pool sizes and types:

	m ³	Models ⁽¹⁾
Small pools and above-ground pools	up to 50 m ³	Max-Flo XL™ VSTD 1 CV
Medium-sized pools	up to 65 m ³	Max-Flo XL™ VSTD 1.5 CV
Medium-sized pools	up to 70 m ³	Super Pump® VSTD
Large pools	up to 100 m ³	TriStar® VSTD 1.5 CV
Large pools	up to 120 m ³	TriStar® VSTD 2 CV

⁽¹⁾ **VSTD : T for Timer**, allowing you to program the operating time directly on the pump.
D for Digital, allowing you to connect external devices (heat pumps, roll-up cover, etc.).

Rotary box for easy access to the interface in very small equipment rooms.

Max-Flo XL™ VSTD
