THE SECRET FOR A SUCCESSFUL POOL

SINCE 1964

INNOVATION 2016

# Pumps **Variable-speed**

EXTREMELY QUIET. SAVINGS. FILTRATION QU

## QUIETER

**Great acoustic comfort, thanks to pumps that rotate more slowly while filtering, as high speeds are used only for backwashing.**

## UP TO 88% SAVINGS ON YOUR ELECTRICITY CONSUMPTION

The total volume of pool water must be renewed at least 3 times a day and is the most expensive energy-consuming item in a pool.

**That is why Hayward continues to innovate with its variable-speed pumps.**

Principle: water circulates continuously at low speed.

Result: **electricity consumption is reduced by up to 88%.**

## MORE EFFICIENT

Thanks to their 24-hour operation:

- water is continuously filtered, treated and heated,
- the pump runs more slowly: **quieter, less pressure and therefore less risk of leakage.**

## DID YOU KNOW?

In summer, on average, **45% of the electricity bill represents the cost of operation**. Thanks to the electricity saved by using a variable-speed pump, **the cost of operation is reduced by up to 88% over the course of 3 seasons!**

QUALITY

## SIMPLE

... to install, even in the case of a renovated pump.  
And the user interface provides access to information and allows **intuitive control of its 3 speeds on a day-to-day basis:**

- 1 | **Low filtration speed:** for normal 24-hour operation
- 2 | **High filtration speed:** to clean up green water or to operate a suction cleaner
- 3 | **Fast speed:** for maintenance operations (cleaning the sand filter, draining the pool, priming, etc.)

## CHOICE

**3 models for different pool sizes and types:**

	MODELS <sup>(1)</sup>
Small or medium-sized pool and above-ground pool	<b>Max Flo XL VSTD</b>
Versatile pump for family pools	<b>Super Pump VSTD</b>
Average or large pool with extra-wide pre-filter basket	<b>TriStar VSTD</b>

<sup>(1)</sup> **VSTD : T for Timer**, allowing you to program the operating time directly on the pump.  
**D for Digital**, allowing you to connect external devices (heat pumps, roll-up cover, etc.).

Rotary box for easy access to the interface in very small equipment rooms.
