

USER-FRIENDLY, SAVES TIME AND MONEY, GIVES PEACE OF MIND,  
**HAYWARD®'S CONNECTED SOLUTIONS OFFER**  
**MANY ADVANTAGES:**

- **You can delegate** your pool treatment and filtration to a **smart system**.
- **You can view and control** all your pool's basic functions remotely from a smartphone or tablet: filtration, heating, lighting, etc.

 Filtration time control	 Heating equipment control	 Lighting control	 Additional equipment control	 Water treatment control	 pH / Redox control
--	--	---	---	--	---

- **You can save money** thanks to more accurate and reactive control and by combining **new generation equipment**.

---

**ONLINE SERVICES**

- Additional extended warranty offer
- Free newsletter subscription
- Pool configurator
- Energy savings calculator
- Online expert
- Spare parts catalogue

Less maintenance,  
 more savings:

CONNECTED SOLUTIONS  
 by HAYWARD®

PUMPS    FILTERS    LIGHTING    WHITE GOODS    SANITIZATION    CLEANERS    HEAT PUMPS

# Connected solution: easy to operate!

# New generation equipment: the winning combination

## 1 GET FITTED OUT

Control Station  
Water treatment  
by liquid chlorine injection.  
Remote equipment control.

OR

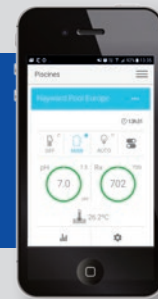

AquaRite® +  
Water treatment  
by salt chlorination.  
Remote equipment control.

## 2 DOWNLOAD THE FREE POOLWATCH APP

Hayward Poolwatch  
allows you to programme your devices  
easily and instantly determining your pool  
parameters: temperature, pH and ORP  
level, filtration time, etc.

Control Station et AquaRite®+  
can be connected to the Internet  
via the Poolwatch app.

## 3 IT'S WORKING

You can go to manual mode to change or adjust your settings at any time.

	SINGLE SPEED [ 2800 tr/min ]	VARIABLE SPEED [ 1500 tr/min ]
Filtration time	8 HOURS	24 HOURS
kWh Consumption over 6 months	002044	000864
Cost	306€	129€

**+85% SAVINGS**

### VARIABLE-SPEED PUMPS: SAVINGS OF UP TO 85%\*

This is an essential point, considering that filtration is the most expensive item of pool energy expenditure!

**Variable-speed pumps adjust their speed to the requirements of the pool.** Result: electricity consumption is reduced by up to 85%. But that's not the only interesting point...

Thanks to their 24-hour operation:

- slower speed through the filter increases **filtration efficiency**,
- the other equipment (heating, electrolysis, etc.) always operates **at optimum performance**,
- **quieter and more reliable**.

**-6000 L OF WATER A YEAR**

8 x 4 x 1.5 m POOL  
Filtration with backwashing = 5600 L/year  
SwimClear™ filter [ no need for backwashing ] = 0 L

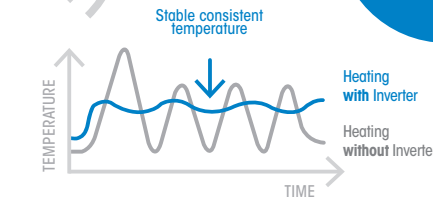

### SWIMCLEAR™ CARTRIDGE FILTERS: 100% COMFORT

With cartridge filter technology, **no need for backwashing**, or additional products such as flocculants.

- **Comfort and savings are ensured.** They save on average **6000 litres of water a year**.
- **SwimClear™ filter, twice as fine** as a sand filter (20 to 25 microns). **It is ideal for use with a variable-speed pump.**

**+30% SAVINGS**

EnergyLine® Pro Inverter

### HEAT PUMPS WITH INVERTER TECHNOLOGY: SAVINGS OF UP TO 30%

**Heat pumps** fitted with **Inverter technology** automatically regulate compressor power according to outdoor conditions to:

- **intelligently adjust** the power, electricity consumption and noise level to the actual needs of the pool, thanks to its control logic,
- **extend service life**, with smooth, even operation.

\*Potential savings of 65% generally noted.
